

---

## SUMMARY

---

As a people-driven software engineer with a creative edge and strong curiosity, I am passionate about teamwork and strong relationships as the foundation of software building. During my journey as a software engineer, I have:

- Led a tech webinar titled "[OHUB 365 - A Day in the Life of a Coding Bootcamp](#)".
- Been featured as a guest on the [Tech Unlocked Podcast](#), speaking on the art of tech education.
- Served as a [panelist](#) for [Fablearn NYC STEM Conference](#), discussing the intersection of software engineering and culture.

As a software engineer, I pride myself on solving complex problems, deriving innovative and efficient solutions for optimized performance, and ultimately collaborating across teams to help companies drive their mission and achieve their goals.

---

## TECHNOLOGIES

---

JavaScript, Python, Django, React, Node.js, Ruby, Rails, HTML5, CSS, Redux, Git, PostgreSQL, MongoDB

---

## EXPERIENCE

---

**Momentum Learning, Inc.** *Associate Software Engineering Instructor* 05/2020 - Present

- Provide visual and hands-on instruction through guided-walkthroughs and lectures for a 12-week immersive web development bootcamp covering HTML, CSS, JavaScript, Git, Python, and Django.
- Support cohort of Black/Latinx students technically and emotionally through individual guidance, daily code reviews, pair-programming exercises, and mentorship.
- Facilitate team projects with agile practices such as sprint-planning, daily stand-ups, and retrospectives.
- Partner with the instruction team to iterate and improve remote web development instruction methodologies and maintain a cohesive student experience during a time of crisis.
- Write code examples to thoroughly demonstrate software development concepts in relevant contexts.

**Apple Specialist**, New York, NY 08/2019 - 01/2020

- Maximized sales efficiency during a high-traffic holiday season and achieved a top customer satisfaction rating of 5/5 through one-to-many customer interactions, troubleshooting technical issues, training customers on best practices, and recommending solutions for small businesses.

**Create Labs Ventures Program Manager**, New York, NY | [Event Recap](#) 08/2019 - 01/2020

- Produced new partnerships with tech organizations, such as Techstars, resulting in exposure to 1000+ job opportunities for marginalized populations, and engaged 100+ youths for a tech event series.

**Mari World LLC Artist**, New York, NY | [Mini-Documentary](#) 03/2015 - 06/2019

- Orchestrated workflows between producers, attorneys, managers, and visual artists that resulted in 20,000+ online fans and 1.5+ million views/streams across all digital platforms, including Spotify.

**M&T Bank Digital Banking Business Analyst**, Buffalo, NY 07/2014 - 03/2015

- Increased mobile adoption rate by 45% by researching key consumer insights from online and social media and collaborating with the engineering team to improve the UX/UI for the mobile banking app.

---

## EDUCATION

---

**Flatiron School**, Brooklyn, NY 01/2020 - 04/2020

- Completed an immersive software engineering program focused on full-stack development in Ruby on Rails and JavaScript development.
- Developed a digital news bookmarking app titled "[Owed News](#)" by [designing a lightweight Rails API](#) that calls the Google News API consisting of 50,000 articles and feeds customized data into [React/Redux](#), resulting in an overall 20% decrease in latency for query and insert performance.
- Served as lead developer for a social web application titled "[UniOne](#)", utilizing [Ruby on Rails' object-oriented design](#) to model a SQL database, create interaction between objects, and implement the MVC framework to efficiently direct user requests and server responses.

**Williams College**, Williamstown, MA  
Bachelor of Arts, Psychology

08/2010 - 06/2014
